About RAAK PHARMACY

The Farouk educational trust is a registered organization, established in the year 2003 by the founder and chairman Er.B. Mohamed Farouk, also chairman of Farouk Bros & Co, in Bangkok and Hong Kong. We offer a very lively learning experience to around 3000 scholars every year. Our Trust has laid its landmark for itself in the educational hub of both Tamil Nadu and union territory of Pondicherry.

So far keeping 20 years of excellent academic result in the field of Engineering & Technology, Arts & Science, Nursing and other Paramedical courses, taking another significant step ahead, the RAAK group of institution introduced the Pharmacy Course in the year 2022 approved by Pharmacy Council of India. D.Pharm (Diploma in Pharmacy) with the intake of 60 students and B.Pharm (Bachelor of Pharmacy) with the intake of 60 students in the academic year 2022-2023 in the name of RAAK College of Pharmacy.

What is Pharmacy?

Pharmacy is an interdisciplinary domain at the interface of natural sciences, medicine, and technology. It is basically the practice of discovering, producing, preparing, dispensing, reviewing and monitoring medications. The main goal of pharmacy is to ensure the safe, effective, and affordable use & application of medicines. It is a miscellaneous science that interfaces health sciences including medicine with pharmaceutical sciences and natural sciences. The foundational aspect of pharmacy is based on four pillars which includes pharmaceutics, pharmacokinetics, medicinal chemistry & Pharmacognosy and pharmacy practice.

The professional practice of pharmacy is evolving into clinically oriented drugs as they are manufactured by pharmaceutical industries. There are many types of pharmacy practices including community pharmacy, institutional pharmacy and clinical pharmacy. Providing direct patient care in the community of institutional pharmacies is considered clinical pharmacy.

The convergence of technology and science has led to new avenues within pharmacy. Nanobiotechnology based targeted drug delivery systems, nuclear pharmacy, Pharmaco-cybernetics, Cheminformatics, Neuroinformatics for pharmacy, fabless molecular designs are some of the interesting areas within Pharmacy research.

Bachelor of Pharmacy Curriculum
